

1. Create an HTML webpage that displays a form with following elements : First Name, Last Name, Gender, Subject of interest, Language known, Date of Birth(dd-mm-yyyy), Contact No., Address, Pin code, State, Country with reset & submit . Use proper CSS for styling

2.

Create a clone homepage of NITW having following functionalities :-

- a. Institute Logo
- b. Nav-bar (only having top visible name of NITW sites)
- c. Announcements (moving texts)
- d. Image slider
- e. News & Events layouts same as that site.
- f. Campus life (images)

3.

Create an interactive website featuring healthy recipes. The site should be user-friendly and informative, appealing to those interested in healthy eating.

- a. The homepage should have a navigation bar with three tabs:

- i. Breakfast

- ii. Lunch

Dinner

- b. Each tab should redirect to a separate page dedicated to that meal type. These pages are:

- i. breakfast.html

- ii. lunch.html

Dinner.html

- d. Each of these pages should list at least 3-4 recipes relevant to the meal type.

- e. Clicking on any recipe should lead to a detailed recipe page. This page (recipe-detail.html) should include:

- i. The name of the recipe.

- ii. The estimated calorie intake.

- iii. Health benefits of the recipe.

- iv. Detailed instructions on how to prepare the dish.

4.

Design a website for the Tourism Sites of a given City. There should be at least 5 web-pages present in the web-site. There should be:

- a. One Home page that leads to other pages. The Home page should contain the name of the City as heading along with a logo. There should be a tab with the following links:
  - i. Home
  - ii. Heritage
  - iii. Hotel Booking
  - iv. Gallery
- b. There should be an appropriate description of the website on the home page.
- c. One Heritage page which contains a list of all the Heritage Sites present in the city. The list should be a list of Pictures. There should be a minimum of 5 heritage sites. Each Image entry in the list should be a HTML link/button that leads to a web-page totally dedicated to the Heritage Site itself.
- d. Each Heritage Site should have its own dedicated web-page. This page should contain a description about the site along with its history.
- e. The Hotel booking page basically contains a form that a person needs to fill up in order to stay in a hotel. The form should ask all the necessary questions using appropriate form elements.
- f. One gallery page contains a set of photos taken of the Heritage Sites throughout the city.

Note: Please note that each web-page in this website should have the same background Image/color. The looks of each page should be similar.
